SUMMARY

Full Stack Developer (Django/DRF + React + Node.js) with internship and professional experience building production-grade CRM/ERP systems and an AI medical assistant using RAG and PostgreSQL pgvector. Strong in backend development, real-time communications, authentication, REST API design, database modeling, and containerized deployment. Seeking to contribute to modern software development teams.

PROFESSIONAL EXPERIENCE

Full Stack Developer – InfiToolz Business Solutions | CA Practice OS Live Demo — June 2026 – Sep 2026

- Architected and developed multi-portal ERP system for CA firms covering CRM, compliance, HRMS, task management, approvals, and document management modules.
- Designed scalable REST APIs using Node.js, Express.js, and TypeScript; achieved 95%+ code coverage with unit and integration testing.
- Built real-time chat, push notifications, and audio/video calling using Socket.IO and WebRTC.
- Engineered RBAC system with 6+ user roles; automated compliance workflows using scheduled jobs.
- Developed React.js web portals and React Native mobile apps for iOS/Android with offline-first capabilities.
- Optimized PostgreSQL queries using Prisma ORM; reduced query times by 40%.

Tech Stack: React.js, React Native, Node.js, Express.js, TypeScript, PostgreSQL, Prisma, Socket.IO, WebRTC

Python Developer Intern – Veriright Management Solutions — Oct 2025 – May 2026

- Developed REST APIs using Django REST Framework for an enterprise CRM system.
- Implemented lead management, auto-assignment, customer records, and policy workflows.
- Built secure authentication and data access using JWT, PostgreSQL, and Redis.
- Debugged production-level issues including migrations, schema errors, and API failures.

Tech Stack: Django, DRF, PostgreSQL, Redis, JWT

PROJECTS

AI Medical Assistant Platform GitHub | Live Demo

Tech Stack: Python, Django, DRF, React.js, PostgreSQL, pgvector, RAG, Google Gemini API, JWT, Docker, GitHub Actions, Render, Gunicorn, WhiteNoise

- Built a full-stack AI medical assistant using Django REST Framework and React (Vite + Tailwind) with JWT authentication and role-based access control.
- Developed a RAG-based AI chatbot using Google Gemini and PostgreSQL pgvector to provide context-aware responses from users' uploaded medical reports.
- Implemented OCR-powered medical report analysis using Tesseract and pdfplumber, with AI-generated summaries and interactive health dashboards built using Recharts.
- Containerized and deployed the platform using Docker and Render with CI/CD integration, secure API connectivity, and production-ready backend configuration.

E-commerce Web Application GitHub

Tech Stack: Django, React.js, PayPal API, MySQL, Django REST Framework

- Developed a full-stack e-commerce platform with a dynamic cart, user authentication, and admin panel.
- Integrated the PayPal API for secure payments and built RESTful APIs for efficient product and order management.
- Optimized API response time by 20% through caching and query optimization.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL
Backend: Django, Django REST Framework, Node.js, REST APIs, JWT, Prisma ORM
Frontend: React.js, React Native, HTML5, CSS3, JavaScript, Tailwind CSS,
Databases: PostgreSQL, MySQL, Redis
Real-time: Socket.IO, WebRTC
Tools: Git, GitHub, Postman, VS Code, Docker, GitHub Actions, AWS

EDUCATION

Master of Computer Applications (MCA) — 2022 – 2024
Visvesvaraya Technological University (VTU) PG Centre, Mysore | 71%

CERTIFICATIONS

- **Python Fullstack Development** – Pentagon Space (Django, React.js, MySQL, and REST API development)
- **Python Programming** – VTU Online Courses (Jun 2023)
